Affiant's Background

Your affiant has been a police officer for the Lincoln Police Department since 2005. Since 2005, Affiant has been investigating misdemeanor and felony crimes with the Lincoln Police Department to include homicide, burglary, robbery, assault, weapon offenses, narcotics, thefts, sexual assault, human trafficking, child enticement, and pornography. Your Affiant has training and experience in conducting criminal investigations.

This Affidavit is submitted in support of a search warrant. Since this Affidavit is being submitted for the limited purpose of securing a search warrant, your Affiant not set forth every fact known to me regarding this investigation. The statements contained in this Affidavit are based in part on the investigation that your Affiant has conducted, and information provided to your Affiant by other law enforcement officers verbally, and through written reports.

Case Facts

On December 13, 2023, Jaidah Weaver reported to Lincoln Police Officer Neelly that she had received explicit images of herself naked from different social media accounts on December 8, 2023. These images had been privately sent by the victim to others in the past. There were messages exchanged between the victim and different social media accounts that led the victim to believe it was the same person using the different accounts. The victim said the messages threatened to release the nude images of her to other people if she didn't send them more nude photos. The victim was unable to

reproduce the messages between herself and the other accounts because most of them had been sent via Snapchat and she did not save them. The victim was able to show Ofc. Neelly the explicit images of herself she had been sent. The two Snapchat accounts that had been sending the victim messages were “pervsnewsnap” and “lincolnexposed.”

After Ofc. Neelly took the report, he sent a preservation request to Snapchat on the same date, preservation #fa3d1ef2a9. He also sent a subpoena to Snapchat and Meta Platforms regarding these accounts. Snapchat indicated the account “pervsnewsnap” was created on December 6, 2023, and the account “lincolnexposed” was created on December 11, 2023. These subpoenas both returned results showing the accounts utilized to send the messages and images to the victim were sent from the same IP address. This IP address was registered to Windstream Services. Ofc. Neelly subpoenaed Windstream, and the registered account holder was Kenneth Pigford who resided at 2841 Tierra Drive #210 in Lincoln, Lancaster County, Nebraska. Pigford has been developed as a suspect in similar investigations.

On March 15, 2024, your Affiant received results from the search warrant served to Snapchat, which showed there were pornographic images and videos sent to and from the “pervsnewsnap” account. Some of these images and videos were of a female who indicated she was 16 years old.

On March 22, 2024, your Affiant received a report from the National Center for Missing & Exploited Children indicating Snapchat had sent them three images from this account, which were determined to be of prepubescent and pubescent individuals. Two of these images were sent outside of the time frame indicated in the original search warrant, that being on December 16 and 17 of 2023. This search warrant is now seeking all the contents of the Snapchat account “pervsnewsnap” for the entire duration of the account.

### Snapchat Specific Facts

Your AFFIANT knows through their own experiences and those of other Law Enforcement Officers that Snap, Inc. owns and operates a free-access social networking, electronic commerce, and cloud services application(s) of the same name that can be accessed using the Snapchat mobile application(s). Snapchat allows its users to establish accounts with Snapchat, and users can then use their accounts to post “Snaps”, “Stories”, “Memories”, and send and receive “Chats”.

“Snaps” are when a user takes a photo or video using their camera phone in real-time and then selects which of their friends to send the message to. Unless the sender or recipient opts to save the photo or video, the message will be deleted from their devices (after the content is sent in the case of the sender and after it’s opened in the case of the recipient). Users are able to save a photo or video they’ve taken locally to their device or to Memories, which is Snapchat’s cloud-storage service.

“Stories” are when a user adds photo or video Snaps to their “Story.” Depending on the user’s privacy settings, the photos and videos added to a Story can be viewed by either all “Snapchatters” or just the user’s friends for up to 24 hours. Stories can also be saved in “Memories”.

“Memories” is Snapchat’s cloud-storage service. Users can save their sent or unsent Snaps, posted Stories, and photos and videos from their phone’s photo gallery in Memories. A user can also edit and send Snaps and create Stories from these Memories. Snaps, Stories, and other photos and videos saved in Memories are backed up by us and may remain in Memories until deleted by the user.

Using “Chat” a user can type messages, send photos, videos, audio notes, and video notes to friends within the Snapchat app using the Chat feature. A user sends a Chat message to a friend, and once it is viewed by both parties – and both parties swipe away from the Chat screen – the message will be cleared. Within the Snapchat app itself, a user can opt to save part of the Chat by tapping on the message that they want to keep. The user can clear the message by tapping it again.

“Voice” A user can also make voice and video chats using the Snapchat platform. Video chats can be one-on-one or with a group. Snap chat retains records of these contacts but does not retain content.

“Location” Snapchat users can also share their Live Location with select contacts or all of their friends. This option doesn’t include people who’ve added the user as a friend, but who the user hasn’t added back. Live Location data is shared with the chosen friends even while a user is in Ghost Mode. Users can opt out of Live Location at any time without prompting a notification to your friends. When Live Location sharing is enabled, the device’s precise location data is collected and shared with the selected friends even when the user has the Snapchat app closed.

“AI” Snapchat has added an AI feature. My AI is a chatbot currently available to Snapchatters. In a chat conversation, My AI can answer trivia questions, offer advice, help plan a trip, or make other suggestions. My AI is powered by OpenAI’s ChatGPT technology, with additional safety enhancements and controls unique to Snapchat.

Your AFFIANT is aware through research, documentation, prior training and experience, and/or the experience of other investigators that Snapchat collects and stores personally identifying information on their users. This information consists of user supplied information that can be used to identify the user and/or account creator of a Snapchat account.

This information may include, but is not limited to Basic Subscriber Information collected when a user creates a new Snapchat account, alters information at a later date, or otherwise interacts with the Service, Basic subscriber information may include: Snapchat username, Email address, Phone number, Snapchat user vanity name, Snapchat account creation date and IP address, Timestamp and IP address of account logins and logouts.

This information may also include Logs of Previous Snaps, Stories, and Chats Snapchat retains logs for the last 31 days of Snaps sent and received, for 24 hours of posted Stories, and for any unopened Chats or those saved by a sender or recipient. The logs may contain meta-data about the Snaps, Stories, and Chats, but not the content. Your AFFIANT knows in certain limited circumstances it may be possible for us to retrieve the content of sent Snaps. Story content may be available for up to 24 hours, or until deleted by a user. Your AFFIANT knows Memories content may be available until deleted by a user.

#### Machine Cookies

Snap Inc. also uses “cookies” to store and receive identifiers and other information on computers, phones, and other devices. Other technologies, including data stored from the user’s web browser or device, identifiers associated with the user’s device, and other software, are used for similar purposes. “Cookies” are defined in this context as small pieces of text used to store information on web browsers. Companies use “cookies” for

the following purposes: Authentication; Security, Site and Product Integrity; Advertising, Recommendations, Insights and Measurement; Site Features and Services; Performance; Analytics and Research, Records of any user accounts that are linked to the Account by machine cookies (meaning all Snapchat user IDs that logged into Snapchat by the same machine as the Account, identifying multiple accounts utilizing similar machines);
